Agreement Effective Date	July 10, 2026

Legal Review Notice: This document is a draft agreement for internal planning and contractor onboarding purposes. It is not legal advice and should be reviewed by a qualified attorney before use or signature.

1. Parties

This Independent Contractor Agreement is entered into by Bastida Systems LLC and [CONTRACTOR LEGAL NAME]. The contractor legal name and contact details must be completed before signature.

2. Language / Controlling Version

This Agreement is provided in English and Spanish. In case of conflict between versions, the English version will control, unless otherwise required by applicable law.

3. General Collaboration Relationship with Bastida Systems

The contractor may be invited to perform independent creative, design, UX/UI, production, documentation, software, marketing, operational, or related services for Bastida Systems LLC. This Agreement is general to Bastida Systems and is not limited to one project.

Potential projects may include, but are not limited to: La Apertura, FiltraCore, BEOFlow, Bastida Systems website, Bastida Systems internal systems, marketing materials, future products, and future client projects.

4. No Exclusive Project

No assignment to one project creates exclusivity, ownership, employment, or a guaranteed right to future assignments. Each specific project, deliverable, milestone, or work log must be separately approved and documented.

5. Project Assignment Process

Specific work may be approved through Bastida OS, email confirmation, written work order, signed addendum, approved deliverable, approved milestone, or another written record accepted by Bastida Systems. Work outside an approved

scope is not automatically payable.

6. Contractor Role and Base Title

The contractor may be identified internally as Character Artist / UX/UI Designer / Designer for the initial pilot cycle. A title is for project organization only and does not create employment, partnership, equity, ownership, officer status, or authority to bind Bastida Systems.

Future roles, titles, projects, or leadership responsibilities must be documented separately before they become effective.

7. Scope of Work and Project-Specific Work Orders

This Agreement sets the general legal and operating terms. Each specific assignment should identify the project, scope, deliverables, milestones, payment amount, payment schedule, required source files, approval criteria, revision rounds, portfolio permission, and Bastida OS reference if available.

If there is a conflict between this Agreement and a later signed work order, the later signed work order controls only for that specific assignment unless it expressly amends this Agreement.

8. Compensation and Payment Conditions

There is no fixed monthly salary. Payments are made only for approved deliverables, approved milestones, approved work logs, or written payment records. Reported work is not automatically payable.

All work must be approved by Bastida Systems or by an authorized project lead. No payment is owed for incomplete, rejected, unauthorized, or unapproved work unless a separate written agreement says otherwise.

Internal records are maintained in USD. If payment is made in Mexican pesos or another currency, the exchange rate available through the payment platform at the time of payment may be used, and platform fees or conversion differences may affect the final local-currency amount.

9. Funding and Bastida OS Tracking

David Bastida and Rodrigo Ramirez Bastida may jointly fund approved collaborator payments. Every approved payment must still be approved and recorded by project, collaborator, deliverable, work log, milestone, or payment record within Bastida OS or another written system approved by Bastida Systems.

10. Tax Documentation

Bastida Systems may request reasonable tax documentation before issuing payment, including Form W-8BEN if applicable. The contractor must provide accurate tax information and is responsible for their own tax compliance. This Agreement is not tax advice, and the contractor should consult a qualified tax professional with questions.

11. Independent Contractor Status and Taxes

The contractor is an independent contractor and is not an employee, partner, owner, officer, legal representative, or agent of Bastida Systems. The contractor has no fixed monthly salary, no employee benefits, no equity, no ownership, and no authority to legally bind Bastida Systems.

The contractor is responsible for all personal taxes, filings, permits, registrations, insurance, and legal obligations arising from contractor payments or services, unless applicable law requires otherwise.

12. Confidentiality

The contractor must keep confidential all non-public information received from or created for Bastida Systems, including project stories, characters, art, visual direction, code, UI/UX, internal documents, payment information, collaborator information, access to Bastida OS, future plans, and client information if applicable.

The contractor may not share, publish, sell, reuse, disclose, or distribute confidential materials without written authorization from Bastida Systems.

13. Intellectual Property Assignment

All approved and paid deliverables belong to Bastida Systems LLC or the applicable Bastida Systems project entity as directed in writing. This includes designs, source files, concepts, art, UI, prototypes, documents, code if applicable, and related materials.

The contractor must deliver source files when applicable. The contractor may not reuse, sell, license, publish, or transfer confidential project materials without written authorization.

14. Portfolio Use

Portfolio use is not automatically granted. The contractor may show work publicly only after written approval from Bastida Systems, and only in the form, timing, and scope approved in writing.

15. Tools and Access

Access to Bastida OS, Figma, Google Drive, repositories, communication channels, or other tools is limited to authorized project purposes. Bastida Systems may revoke access at any time for security, project, or business reasons.

16. Future Leadership Possibility

Bastida Systems may later invite the contractor to responsibilities such as Lead Designer, Art Lead, UX/UI Lead, Character Lead, Color Lead, Project Lead, Team Coordinator, or Area Lead.

Any future leadership role must be documented separately and does not create employment, partnership, equity, ownership, or authority to bind Bastida Systems unless a separate written agreement expressly says so.

17. No Authority to Bind Bastida Systems

No owner, project lead, contractor, collaborator, or team member may promise unlimited payments, equity, employment, ownership, partnership, or legal obligations for Bastida Systems without written authorization from an authorized representative of Bastida Systems.

18. Termination and No Guarantee of Future Work

Either party may end the collaboration by written notice. Bastida Systems may stop assigning work at any time. Ending the relationship does not remove confidentiality, tax, payment-record, intellectual property, or return-of-access obligations.

This Agreement does not guarantee future work, recurring work, monthly pay, project renewal, or continued access to any system.

19. No Equity / No Ownership

The contractor receives no equity, membership interest, ownership interest, profit share, voting rights, partnership rights, or ownership in Bastida Systems LLC, La Apertura, FiltraCore, BEOFlow, or any Bastida Systems project unless a separate written agreement signed by Bastida Systems expressly grants those rights.

20. Governing Law Placeholder

Governing law and venue should be confirmed by qualified counsel before signature. Placeholder: laws of the State of Nevada, United States, unless counsel or a signed agreement specifies otherwise.

Legal Review Notice: This document is a draft agreement for internal planning and contractor onboarding purposes. It is not legal advice and should be reviewed by a qualified attorney before use or signature.
